

## Proscout Video Van Instructions

- Step 1: Plug into any source cable (source breakdown below)
- Step 2: on the Smart Videohub CleanSwitch 12x12 press **SRC** then the number of the source you want to control. If the source is receiving an input, the video will appear on the small monitor on the CleanSwitch.
- Step 3: select **DEST** and select the number for the monitor you want to display the source feed to.
  - Left Monitor: Destination 1
  - Right Monitor: Destination 2
  - Example: if you're plugged into Source 1 (A cam) and you want to display the output on both monitors, you will press these buttons in sequential order:
    - **SRC, 1, DEST, 1** - Source 1 to Destination 1
    - **SRC, 1, DEST, 2** - Source 1 to Destination 2
- Step 4: audio is controlled through the vehicle's touch screen stereo. The input should be: **AV-IN**. Then turn up the sound using the volume controls on the stereo.

### SOURCES:

- Source 1 (roof - **GREEN**) - A cam
